

# COVID-19 VACCINE INFO

## THE PFIZER-BIONTECH VACCINE

*"Highly Effective"*

**#GetVaccinated**

Developed by Pfizer – a global leader in drug and vaccine manufacturing. The vaccine is highly effective (close to 95% effective after second dose)

Administered by employees of Walgreens at a vaccination clinic held at the facility

The Pfizer vaccine will not infect you with COVID. It has the genetic code so your body produces immunity to protect you. It does not contain the live or killed viral particles

If you had COVID-19, it is safe to get the vaccine which could provide you with more protection. This vaccine requires two shots, one to start building protection and another to ensure you get the most protection the vaccine has to offer
